Team Recycle LLC can help you make a significant impact on the environment by maximizing the amount of recyclable and toxic materials that are recovered from your company's trash.

We are excited to share that last year Team Recycle LLC recovered over 100,000 lbs. of recyclable and toxic materials that would have otherwise erroneously gone into the landfill, and cost our customers thousands of dollars more on their garbage bills.

## What Are The Benefits?

### ●Recycling Recovery:

Team Recycle LLC will be on site 6 days a week, Sunday through Friday, to sort your garbage and recycling dumpsters. Thus preventing contaminated recycling bins and recovering recyclable and toxic materials from the trash.

### ●Large Item Removal:

Items inappropriate for bin disposal, such as appliances and mattresses, are **removed free of charge**.

### ●Waste Management:

Team Recycle will pick up any debris around the enclosures and ensure they are swept and blown out as needed.

When extra pickups are needed, we anticipate them, call them in for you and cover the cost entirely.

Your dedicated Team Recycle driver will monitor and report issues like illegal dumping and drug use to management.

Team Recycle will also ensure proper disposal of toxic materials like paint, bulbs and batteries **free of charge**.

## What Will It Cost Me?

Team Recycle LLC can sometimes offer our service at **no additional cost** to what you already pay for just your garbage service.

Yes, to the surprise of some of our clients, we have been able to offer our service in addition to their existing garbage service for the same price they already pay for their garbage service alone.

Team Recycle LLC's service does not replace your current garbage company, but we work in unison with them. We keep your existing garbage company, while implementing our daily maintenance service. We also pay your garbage bill for you.

When extra pickups are needed, we cover the cost entirely. In teaming up with us, you can count on a set monthly garbage amount that never fluctuates, so you can budget confidently.

## Enclosure After Our Service

## Environmental Impact

Each year a property with 4 enclosures will have kept over 100 dumpsters of recycleable and toxic materials out of the landfill by using our service. How else could you have such a tremendous impact while saving time and money on your garbage costs?

## Enclosure Before Our Service
